

Scar Repairex Kit

To treat old scars effectively at home.

The professional protocol to treat Atrophic scars (e.g. after Acne.)

Scars that are:

- Shrunken
- Contracted
- Sunken
- Disfigured

These scars require a more rigorous treatment for a fast & effective result.

Step 1:

Use a Dermarollex®:

Using a 0.5 mm Dermarollex® roll the skin every night with sixteen passes over the affected skin. This should be done on clean dry skin.

Step 2:

After the dermarolling, Massage Scar Repairex® Ultra over the treated skin.

Step 3:

Massage Scar Repairex® Ultra again in the morning.

Wait ten minutes, then apply (not massage) Sun Blockex® spf 50 sunscreen to protect the treated skin during the day.

Repeat the above procedure every day until the scar has shrunk.
Our special Home treatment contains Dermarollex® & Scar Repairex® Ultra cream (30gm jar).
